

**ISO 19770-1 aligned
software asset
management certification**

Verafirm
CERTIFIED

The Verafirm Certified Advantage

Certification demonstrates that your SAM practices are world-class. Aligned to the ISO 19770-1 SAM standard it provides you with standardized benchmarks to implement and measure the effectiveness of your SAM program. Additionally, leading software publishers offer a two-year audit forbearance to all Verafirm Certified companies giving you confidence and assurance in your program.

Return on investment

Optimizing software usage to the needs of your business increases efficiency and saves you money. 15-20 percent on software costs.

Audit forbearance

Leading software publishers trust Verafirm Certified and will refrain from auditing your company for two years.

Assurance

Knowing that your SAM program adheres to international best practices and that you're getting the value you should from your software.

Global Recognition

Certification distinguishes you in the marketplace, and demonstrates that you are best in class with ISO-aligned SAM.

How it works

Certification is a comprehensive review of your SAM policies, processes, outcomes and license positions. Prior to submitting your application, it is recommended that you assess your existing SAM processes against ISO standards and ensure software deployed is consistent with contracts.

1

Application

Apply for certification with BSA | The Software Alliance.

2

Assessment

An independent auditor will review your SAM program and software license positions.

3

Certification

Organizations that meet the criteria will be awarded Verafirm Certified status which is valid for 2 years.

Why take the next step to Certification?

You already manage your software licenses carefully because software is a key business asset. But taking advantage of international best practices puts you ahead of the game by driving efficiencies and minimizing risks.

Verafirm certifications are awarded to enterprises whose software asset management (SAM) programs are best in class, meeting benchmarks established by the International Organization for Standardization (ISO).
